

Nuclear Careers

Are you interested in a meaningful career that will offer challenging work and the opportunity to serve your community? Are you interested in a career that will offer opportunities for development and advancement?

Dominion Energy offers Nuclear careers for engineers, operators, technicians, craft workers and other professionals in positions ranging from entry-level to senior-level, as well as transition opportunities for those with military training and service.

Our nuclear power stations provide a constant source of electricity while generating virtually no greenhouse gas emissions and one of the most dependable sources of energy available. Technology upgrades to enhance reliability are constantly improving operations—so much so that Dominion Energy’s nuclear stations typically run more than 90% of the time.
