

Application for Ratcliffe Foundation Scholars

2023-2024 Academic Year

The Ratcliffe Scholars Program benefits students pursuing an Associate in Applied Science in Technology degree. Priority is given to students in the trade programs of HVAC, Welding, Electricity, Electronics, Google IT, Computer Technology, and Industrial Technology. The Ratcliffe Scholars Program offers stackable credentials with the goal to produce highly skilled, competent industrial technicians for employment in STEM related fields. Students who graduate with this degree will qualify for well-paying high tech positions. Students may also use this program to transfer to some four-year schools.

Priority will be given to students enrolled in 15 or more credits, and students must enroll in a minimum of six credits. Ratcliffe Scholars must complete the Free Application for Federal Student Aid (FAFSA). Students must use any federal, state, or other financial aid funds first, before accessing Ratcliffe Scholars Program funding. For assistance with completing and submitting the 2023-2024 FAFSA, please contact Carole Read at cread@es.vccs.edu.

Funding in the Ratcliffe Scholars Program may cover tuition and fees, books, supplies and equipment, internships, technology, plus allowances for housing, transportation, and other living expenses. Funds may not be used for personal expenses not related to college attendance, such as entertainment and/or legal fees. Aid will be awarded on a First Come, First Served basis. Students must complete the FAFSA and submit the attached Ratcliffe Scholars Application by July 1, 2023.

For program information, please contact instructor John Floyd at jfloyd@es.vccs.edu
